

KERALASE PRE & POST CARE INSTRUCTIONS

Pre-Care Instructions

- Wash hair (do not use conditioner) the night before your treatment. **Hair must be clean and free of hair products.** Any moisture or product could cause the laser to be absorbed by the hair and result in damage
- You must remain out of the sun or use sun protection (SPF or hat) for a week before and after treatment.

Post Care Instructions

- After the treatment you may notice hairs in the telogen phase (resting phase) may shed due to the slight trauma from the laser. This does not occur regularly, but do not be alarmed if it occurs. Please notify your provider.
- Once the hair and scalp dry naturally, you can resume normal activities including the application of hair products.
- Do not wash the hair for 24 hours to allow the product to fully penetrate.
- Use KeraFactor Scalp Stimulating Solution, KeraFactor Stimulating Shampoo & Conditioner and other products as directed by your practitioner.
